Midtronics bv  
Hoofdveste 6-8  
3992 DG Houten  
The Netherlands

Subject: CAD A/h algorithm.

To whom it may concern

With the introduction of the CAD testers, Midtronics was aiming for developing an A/h algorithm measurement as an option for the CAD Battery testers. Unfortunately as per today this has not been realized and we have no clear view if, and when, this will become available. All other options as mentioned in our sales literature are available.

For additional information in regard the scope of supply and/or tester specification please feel free to contact Midtronics directly or our partner Logic Cell Moscow, attn. Mr. Mikhail Kuligin. Phone +7 495 229 363 or free domestic number 8 800 333 3632.

Midtronics is the leader in Battery Management Innovation. Its products with patented conductance technology are used by most of OEM as essential tool and by major telecom companies in the world. More information could be found at Midtronics web site [www.midtronics.com](http://www.midtronics.com)

Feel free to contact me if there are any questions.  
I can be reached by phone at 31 30 68 68 150 or by fax at 31 30 68 68 158.

Sincerely,

W. A. Nieuwenhuizen
